How does the circular economy work?

Urban+ principles

- + craftsmanship

delivering the highest quality crafted finishes. We're best in class with our fabrication process, functionality and durability
- + product design

our seamless design approach means the things you don't see are just as important as the things you do. We pride ourselves on visual aesthetic and match it equally with durability and function
- + sustainability

we design products to last but the outdoors takes it toll so we have created smart and sustainable programs to lead the way for our industry and to drive the circular economy
- + custom design

we offer a full custom design service and have built a reputation on solving any technical, functional or design challenges for projects of all sizes
- + Australian made

a proud Australian business, we want to keep the Australian manufacturing industry strong. We understand Australia's unique needs and build that into our business programs, product design and function

'join the circular economy and together we  
can reshape the way we drink'

# Choose your Urban+ experience

Urban+ is offering customers ownership options for drinking fountains. Select from our subscription, service & maintenance and ownership models.

## Subscription

For a small monthly fee, get an **Urban+** drinking fountain without the hassle. We handle everything from installation, maintenance and the ongoing life of the product

## Service & Maintenance

Purchase an Urban+ drinking fountain, sign up to our service & maintenance program and we will help extend the life of your drinking fountain

## Ownership

Purchase an Urban+ drinking fountain and have confidence you purchased something built to last! Remember to contact us for any restoration needs

**Our commitment**  
By 2025 we believe we can transfer 50% of our business to our subscription or service & maintenance program

# How it works

## Subscription

Our subscription model comes with a commitment to place once and never worry again. By subscribing with Urban+, you are only paying for the service of the product, we take on the responsibility of making it last a lifetime.

## Why subscription is better

In a linear economy, drinking fountains are purchased, rarely maintained and then placed in landfill. In a circular economy, subscription creates a shift to create product that is built to last rather than designed for replacement.

## By subscribing we will:

- + install your drinking fountain
- + take care of all of the maintenance of drinking fountains
- + install upgrades if legislation changes (for example any watermark changes)
- + keep fountains tidy, hygienic and in great shape to last longer

## By subscribing you:

- + keep fountains out of landfill
- + contribute to driving the circular economy
- + never have to worry about installation or maintenance costs
- + never have to buy new again

## Service & Maintenance

Our service & maintenance model is designed to give asset owners the confidence Urban+ will keep their drinking fountains in great shape and extend the fountains life.

## What is different from subscription

- + customers still purchase and own the fountain
- + if the drinking fountain is ever beyond repair, owners decide what they want to do with the asset

## What is the same as subscription

- + everything else, we will take care of everything from installation, maintenance, changes to legislation, restoration and more

## Ownership

Purchase your built to last drinking fountain and enjoy. At any point you can join our service & maintenance model and remember to contact us for any restoration needs.

#### **+ reduce**

We create premium drinking fountains that last

#### **+ restore**

We repair your old Urban+ drinking fountain to like 'new'

#### **+ reshape**

Your thinking. Help us support the shift to a circular economy

#### **+ recycle**

We will take your non restorable drinking fountain to stop it entering landfill

## **Restore + Refill**

### **Our Restore + Refill Program**

Our restoration program allows Urban+ drinking fountain owners to restore their fountain to 'like' new once the outdoors have taken their toll. Our goal is to stop the behaviour to always replace with new and keep Urban+ products and materials in use.

### **Important for the planet**

Nature takes its toll on outdoor drinking fountains, so we ask all businesses who require replacements, does the replacement have to be new? Our restoration service allows customers to return their old Urban+ drinking fountain so that we can make it like 'new' again. We believe restoring old drinking fountains can have a positive impact on the environment while leading change for the Australian manufacturing industry.

### **Important for you**

Our promise is to create the highest quality of product that lasts for years to come whilst challenging the need to always replace with 'new'. By offering a choice to restore you can help reduce waste. Together we can Reduce, Restore, Reshape & Recycle outdoor drinking fountains to help the planet and save money.

**Our commitment**  
Every asset owner will know about  
our restoration program by 2021

## refill stations & drinking fountains

## Refill stations

The BF200 water bottle refill station is ideal for today, as we become more conscious of environmental impacts of plastics.

Made from heavy duty steel, the BF200 has Watermark Certification and gives its user practical access to easily refill their drink bottle. Easy, convenient and with an optional filter, the BF200 helps to reduce the need for single use plastic bottles and promotes health and wellbeing.

# Urban+ for schools

The wall mounted BF200W & BF200WM refill stations are compact, strong and robust. Easy to use and ideal for schools, day care centres, or any outdoor recreational areas where access to fresh water is required.

## Why choose Urban+ for schools

+ specially designed to fit seamlessly above existing bubbler systems and create an all-in-one wet area

+ designed to reduce water waste and provide a fast refill solution

+ does not require hand touch (push with arm or elbow)

## Urban+ conservation

We're focussed on reducing waste to support the shift to a circular economy. From water preservation through to sustainable packaging, we are looking at ways to transition.

**Our primary focus is to reduce waste through:**

### Water conservation

We are committed to preserving water in any way possible. We understand water is a precious resource and water waste is a huge environmental concern. To help, we have connected with leading industry partners. **Ask us about smart solutions for water conservation.**

### Refill stations

The more refill stations, the less need for single use plastic bottles. We will continue to campaign for more accessible drinking fountains and refill stations.

## Architectural fountains

The A280 drinking fountain is a best seller. Architecturally designed and built to last, this premium unit comes with a bottle refill outlet and custom designed stainless steel basin. The unique sand/debris resistant activator creates a surface making it one of the most vandal resistant units on the market. Practical and stylish, it will complement any urban streetscape or park setting.

# Traditional fountains

A880 and A900 offer a traditional design with modern function. Designed with disability access in mind, these two fountains offer the best there is in drinking fountain solutions. Ideal for parks and urban landscapes. Both fountains include our signature vandal resistant one-piece construction to create both a premium finish and product that is hard to damage.

# Pet fountains

The PF400 & PF450 are strong and robust drinking fountains perfect for dog off leash areas, council parks, and any outdoor environment where access to water for dogs is required. Both models come with a water bubbler for human use and a self-returning tap and easy tipping bowl for dogs. An additional water bottle refill option is available on both models to allow water bottle refill for pet owners while exercising or enjoying the outdoors with their furry friends.

**urbanff.com.au**

Urban+ outdoor furniture is made of the highest quality, imported Kwila, suitably seasoned and treated with a double stain for durability and enhanced natural appearance. All furniture is customisable for any project.

All of our timber is FSC certified and ethically sourced.

# Alperton seat\*

Manufactured in cast aluminium with timber slats, the Alperton seat has been ergonomically designed to give a comfortable seating position.

**+ features**

- cast aluminium
- kwila timber battens 168mm x 31mm, 68mm x 31mm
- available in a variety of powder coated colours
- raw alloy finish available
- all timber battens are double stained with weather protection coating

**+ optional changes**

- raw alloy finish
- perforated sheet metal instead of timber battens
- optional arm rests

\*Alperton seat pictured with arm rests - not included in the standard model

# City bench seat

The City Bench Seat – wall mounted is suitable for areas within cities and parks that may have restricted footpath access or areas seeking a modern slim approach to traditional bench seating.

**+ features**

- wall mounted bench seat height: 500mm (variable depending on wall mounted position)
- width: 450mm
- length: 1600mm (variable lengths available to suit)
- galvanised steel frame
- kwila timber slats 42mm x 68mm
- available in a variety of powder coated colours
- galvanised finish
- all timber battens are double stained with weather protection coating

**+ optional changes**

- standard seat with legs
- arm rests
- variable lengths available
- aluminium or steel battens
- skateboard restrictors

Visit our website for our full range of bench seats and picnic tables  
**urbanff.com.au**

# PT02

The PT02 is a heavy duty picnic table with separate seating and recessed leg supports to accommodate wheelchair access.

- seats: 6-8 persons
- wheelchair access at either end of table
- aluminium support frame
- kwila timber slats 31mm x 68mm
- powder coated in your choice of colour
- surface mounted with Dyna bolts
- all timber battens are double stained with weather protection coating

Seat height 450mm x length 2000mm x table height 800mm

**+ optional changes**

- aluminium battens instead of timber
- extra seating on request
- variable height and length

# PT06

The PT06 incorporates high quality Kwila timber, polished stainless and powder coated mild steel to create a modern picnic table. The centre panel and bull nose timber edges create a stylish design that is not generally found on standard picnic settings.

- seats: 6-8 persons
- wheelchair access at either end of table
- aluminium support frame
- kwila timber slats 31mm x 68mm
- powder coated in your choice of colour
- surface mounted with Dyna bolts
- all timber battens are double stained with weather protection coating

Seat height 450mm x length 2000mm x table height 800mm

disabled accessible

**+ optional changes**

- aluminium battens instead of timber
- extra length up to 2500mm on request

# PT03

The PT03 is a one-piece strong and durable picnic table with seating attached to accommodate 6 people.

- seats: 6 persons
- galvanised steel support frame
- kwila timber slats 140mm x 31mm
- powder coated in your choice of colour
- surface mounted with Dyna bolts
- all timber battens are double stained with weather protection coating

seat height: 504mm x length: 1750mm x table height: 807mm  
table width: 870mm x total width: 1650mm

disabled accessible

**+ optional changes**

- extra length up to 2000mm on request

Outdoor showers

The simple lines of our showers will complement any beach, public swimming pool, private apartment or resort.

Using only high quality stainless steel, an Urban+ shower is tough enough to withstand the harshest coastal environments. With all activation buttons on timers, water wastage is not an issue.

Park bins

Designed with stainless steel, 8mm steel plate or aluminium. Our range of bins are made strong and durable.

As one of Australia's leading suppliers of street furniture, Urban+ has a range of bins suitable for any outdoor project.

Dog park accessories

Perfect for off-leash areas, City Councils are recognising the need for dog play and exercise equipment in local parks. Urban+ dog equipment is perfect for agility drills and training, as well as being great exercise and a fun way to stimulate their mind.

All equipment is powder-coated galvanised steel to handle the most frequented dog parks and available in a variety of colours.
