

Hydration Solutions for Schools and Clubs

Making life better

urbanff.com.au

At **Urban+** we believe there is a better way to do business.

Our mission is to support the shift to a **circular economy** by supplying sustainable drinking fountains and street furniture that not only enhance public spaces but can remain in use for generations to come.

CF400 Multi Bank Chiller Drinking Fountain and Bottle Filler

The new CF400 chilled water fountain has been specifically designed for high volume use in places such as schools or sporting clubs.

The CF400 is a modern looking, easy to maintain fountain, designed with circularity principles for future sustainability. Urban+ have incorporated material choices and design features to ensure the CF400 performs not only during its intended design life but beyond, by being reused/ recycled/refurbished or re purposed easily, keeping materials in use for longer and out of landfill.

The CF400 comes with a variety of options including wall mounted, floor mounted, with or without chilling capacity, premium personalisation signage, additional side basin access to meet AS1428 requirements and the choice to have only 2 or 3 tap/bubbler combinations.

Do you need to buy NEW?

As part of our commitment to circularity, **Urban+** always asks our customers, **do you need to buy new?**

Most schools still have reasonable, functioning hardware that can still be used when upgrading their facilities. It is often more **cost effective, time efficient** and **environmentally friendly** to retrofit existing units with upgraded hardware than to throw them in to the waste and start anew. **Urban+** is able to offer a complete range of solutions from retrofitting existing hardware, improving and upgrading facilities, to offering a new purpose designed **solution for your school.**

Need more bottle fillers?

Utilising existing troughs with bubblers only, Urban can install a bottle filler strip to add instant refill solutions utilising the existing plumbing and drainage.

Solution 1

Need chilled water?

Utilising existing troughs and bubblers, Urban can install a chiller unit to chill existing water bubblers. Why not add some bottle refill strips at the same time to maximise the use of your chiller, while still utilising existing plumbing and drainage and minimising the civil works..

Solution 2

Need vandal resistant tapware?

If you have a small existing chilled unit that has a broken goose neck bottle filler. Urban can add a strong, single tap bottle filler using your existing chiller unit to keep it working for years to come.

Solution 3

Why choose Urban+

- + Australian Made products – all products are manufactured in our factory located in Yatala, QLD and distributed nationally
- + All drinking fountains are WaterMark certified
- + ISO Quality Management System certified
- + Commercial grade
- + Built-in vandal resistance
- + Disabled accessible options to meet AS1428 requirements
- + Product branding options
- + Choose from Dulux's full powder coat colour range
- + Customisation of all our standard products allowed
- + Full custom design service available
- + Service & Maintenance and Refurbishment services offered
- + Product leasing option
- + Trade in Program
