

JOB SPECIFICATION INSTALLATION GUIDELINES “Soak Thru” Porous Paving

Extent of works

Urban Fountains and Furniture will prepare the site where required, supply the necessary materials and install Soak Thru porous paving.

In Summary the work will include (where applicable)

- Barricades around the work area
- Preparation of site, including, but not limited to, removal of existing surface and excavation to required depth
- Any necessary root management if requested
- Supply and installation of blue metal layer
- Supply and installation of Soak thru porous paving

Site Inspection

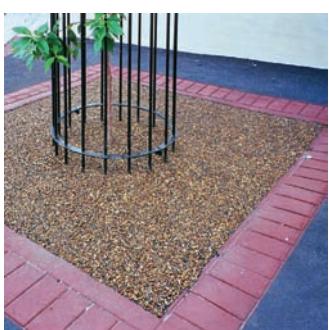

Before any quotations can be prepared or work commenced, an inspection of the site is required to assess:

- The number and location of installations to be undertaken
- The excavation and site preparation needed
- The nature of the installations eg depth and size and type of stone to be used
- Possible requirements of removable sections at the base of the tree to take into account for future tree growth
- Any other site issues to be assessed eg restricted access

Cost

Due to the many different variables as outlined above, cost can only be determined once a full assessment / site inspection has been completed.
