

INSTALLATION AND MAINTENANCE Showers

- ❖ Flushing of inlet water pipe is essential before connecting to the shower to help prevent blockage caused by debris.
- ❖ When installing all local and state plumbing codes should be adhered to.
- ❖ Must be installed by a qualified plumber.
- ❖ Incorrect installation will affect shower performance.
- ❖ Urban Fountains and Furniture will not be responsible for defects that arise from incorrect installation.
- ❖ All showers are water tested prior to leaving the factory.
- ❖ Locktighting of foundation cage bolts is recommended.
- ❖ Due to the nature of Stainless Steel we recommend weekly washing with water and detergent.
- ❖ Regular polishing with a non-abrasive polish will help maintain the exterior of the shower.
- ❖ To maintain easy access over long periods of time, we recommend the use of anti-seize paste on all external bolt threads.
- ❖ Always ensure the correct security screwdriver is used when undoing external bolts.
- ❖ All maintenance tools and replacement parts can be purchased individually from the manufacturer.

Exterior care (Powder Coated)

- ❖ Painted showers that become dull due to prolonged exposure to direct sunlight can be restored with an appropriate surface polish.
- ❖ Regular washing down of the exterior surface will help prolong the lustre of the painted finish.
- ❖ Do not use any solvents on the surface as this will adversely affect the longevity of the painted finish.
- ❖ Surface scratches and inconsistencies can be touched up using Dulux touch up paint. Most colours can be matched.

Exterior care (Stainless Steel)

- ❖ Rinse with clean fresh water and dry thoroughly.
- ❖ Remove ordinary stains with a mild soap and warm water. More stubborn stains can be removed with a commercial grade cleaner suitable for use on stainless steel.
- ❖ When cleaning off harsh stains ONLY rub in the direction of the grain of the steel.
- ❖ DO NOT use steel wool as it will contaminate the finish and encourage rust.
- ❖ Test any use of a cleaner or scrubber on an inconspicuous area first.
- ❖ Scratches can be gently blended back by gentle rubbing with the grain.
- ❖ Finish with a Stainless Steel Polish to protect the surface from corrosion and give it a shine.
