# Company

Urban specialises in working with councils to provide you with a range of high quality, durable and locally produced street furniture for use in your projects. We can also design and supply custom-made furniture to your specifications.

Over the years, our focus has always been on providing a good product, but also making the lives of our specifiers and design partners easier. Working with us ensures you a smooth design process where your concepts are translated to reality with a minimum of hassles.

By manufacturing in-house locally in our Queensland facility rather than sending the job offshore, we also give you the peace of mind that you are specifying a product that will deliver, and keep delivering.

Urban Fountains and Furniture is a family owned and operated business, and is managed by proprietors Gary and Claire Allan.

When you deal with Urban, you can be assured that you will be supplied with high quality, yet reasonably priced street furniture, accompanied by a high level of personalised service. We pride ourselves on always delivering high quality products every time, on time.

At the end of the day, we value and encourage close working relationships with our clients and truly enjoy helping them create new & exciting urban landscapes.

# Delivering What Counts

**Reliability** Your deadlines will be met, because we simply deliver products on time and do everything we say that we are going to do.

**Practicality** Our tradesmen have many years experience and know which designs and ideas will work best to help you achieve what you want.

**Flexibility** Because we are the manufacturer, we can alter anything to your requirements and work within whatever constraints you may have.

**Efficiency** Whether your project is small and simple or large and complicated, we are structured to appropriately prioritise your job according to your needs.

**Understanding** You want a high quality product at a reasonable price within a reasonable time. We understand that and will support you to make it happen.

**Passion** With Urban you are working with a team of people that are passionate about what we do, and take pride in doing it well.

**High Quality** All our products are made to the highest possible standard. We use only first grade materials and professional staff and tradespeople.

**Competitive Pricing** We deliver at a very good price because we are the manufacturer. There is no "middle man" taking his cut, so you reap the savings.

# Custom Design

You will benefit from Urban's full custom design service that allows close consultation between you and our in-house design and manufacturing team.

You are able to concentrate on the important aspects of your project because we are able to help you reach a practical working solution to your unique design concepts. We can work within many design, budget or time constraints that may be enforced on a project or development, and see our role as to simply help you get the job done with the best result for the client.

Our team are able to offer advice on any alternative use of materials, fixings and finishes that may result in a more practical or economical item without compromising the final quality, functionality or aesthetics of the finished product.

We can help you through every step of the process to final manufacture and delivery by working with you using the latest 3D Auto CAD technology. This makes it far easier when planning the overall look and functionality of a given job because it brings graphic visualisation to your concepts.

We can also provide scale models and prototypes ahead of production. Our approach allows our clients to be involved as much or as little they want.

Some customers know exactly what they want so we provide an engineering advisory role regarding different materials or variations to design that may result in increased functionality or cost savings.

Other clients tell us what look or function they require and perhaps what budget they have and we will come up with some designs for them to approve or alter.

We offer stage by stage consultation and feedback, but the intricacy of the process is up to you and is dependent on the complexity of the job.

Additionally, all of our standard product range can be modified to suit your application. As the manufacturer of these products we are able to alter dimensions, substitute different materials or add/remove components from any item as desired.

Hayman Island Gabions  
for Jamie Durie Designs

# Quality Furniture

Urban's manufacturing facilities have a fully equipped general engineering workshop and in-house gravity die casting facilities.

This allows you to reap the benefits of dealing with a supplier that is able to exercise an extremely high level of quality control as all key stages of the manufacturing process are conducted in-house. The products are built to be extremely durable so they'll look good for a long time, not just when they leave the factory.

Due to our flexible approach to manufacturing, we are able to accommodate you if you want to get alterations or modifications made to any listed product.

If your job is of a high priority due to a tight delivery timeframe, we are able to fast-track those jobs if required. You also have the peace of mind of knowing that you are kept fully informed as to the status of your job at any given time.

Not least importantly, Urban is able to keep costs competitive because we do not outsource to subcontractors.

Macquarie One, Tenerife

# Vandalism Resilience + Adaptability

You are assured that any furniture provided by Urban has been manufactured to provide an industry leading level of quality. Our extensive experience in manufacturing strong and durable furniture means you will not only receive attractive and functional furniture, but will benefit from ongoing lower maintenance and repair costs.

Outdoor furniture will always be the subject of mindless vandalism and graffiti, but there are ways to minimize the impacts of such actions. By utilizing high-grade concretes and steel in our designs, Urban's furniture is virtually indestructible meaning the potential damage caused by fires or vandalism is greatly reduced.

We install as many fittings and fixtures as possible internally in the furniture so that they cannot be accessed and damaged.

Furniture components cannot be pulled apart and the furniture itself is heavy and not able to be easily removed. Any external visible fixtures and fittings that are necessary are locked with security screws or chemset bolts.

Urban can also include Rapelle graffiti coatings, suitable as an anti-graffiti shield to further cut ongoing maintenance costs.

All of these design features ensure that Urban products are durable and resilient enough to be used in high-use environments as well as your more remote locations.

The bottom line is that Urban's designs are stylish and robust enough to deliver both aesthetically and functionally.

# Sustainable Development

Urban takes a holistic approach to proactively reduce waste and promote sustainability. This means that sustainable initiatives are prevalent throughout our company culture and extend through to our choices of suppliers and partners. We realise that in order for our business to be sustainable, environmentally friendly and ethical practices are vital areas of development.

Initially, our focus is on reducing waste during our manufacturing process. Materials are carefully chosen on ordering and cut/fabricated in ways developed to minimise wastage. Recycled plastics and timber are also offered as alternative components in all of our furniture. These materials are sourced only through rainforest alliance certified traders that are proven to be environmentally friendly and are involved in re-forestation programmes.

All materials from steel, stainless, aluminium and timber that are unable to be further utilized are recycled through local reputable companies. Similarly accredited and reputable companies also handle the recycling of any packaging materials, cardboards and plastics used. All consumable products that cannot be recycled are disposed of considerately and according to Council regulations.

We have recently relocated to a new manufacturing facility built to further comply with regulatory guidelines and recommendations for energy efficiency and conservation. The installation of water tanks and water saving devices in bathrooms and wash bays, and the preference for energy efficient lighting through all offices are just some of the initiatives that form our commitment. The workshop skylights have also enabled us to eliminate the use of harmful mercury lamps for our lighting requirements.

Through these improved factory and manufacturing practices not only have we been able to reduce our environmental impact, but also create key cost benefits that can be passed on to our clients.

# Products // Drinking Fountains

# Drinking Fountain: Apollo 300

The Apollo 300 is a durable, vandal resistant outdoor disabled accessible fountain. It is just one of our fountains in the Apollo range designed for disabled access.

- Dimensions**
- Total Height: 835mm
  - Clearance Height: 735mm
  - 200mm x 100mm RHS steel

# Drinking Fountain: Apollo 880

The sleek new Apollo 880 stainless steel fountain features a uniquely curved angled body like no other design in the current market. Like all Urban's outdoor disabled accessible fountains, it is durable and vandal resistant. The Apollo 880 is the "big sister" to the Apollo 800, and follows on from that popular design. It retains many of the practical functionalities of that model with just a newer, more dynamic body design.

## Dimensions

- Total Height: 915mm
- Clearance Height: 846mm
- Base: 300mm x 200mm Tapered to top

## Water Receptacle

- One piece heavy duty construction
- Easy access grab rail

## Plumbing

- 316 Stainless steel basin
- Nozzle material 316 stainless steel
- Stainless steel easy action activator lever

## Finishes

- In built water pressure regulator ½' inlet
- 40mm Waste outlet pipe

## Fixings

- Stainless steel finish
- Primed and 2 pak epoxy wet spray finish
- Powder coated. Available in many different colours. Please see colour selector.
- Anti graffiti

## Options

- Surface mounted with Dyna bolts or in ground fixings with foundation cage.
- All bolts internal
- All fountains come with vandal resistant 316 stainless steel security screws
- Optional tap &/or dog bowl available
- Full parts and technical back up service available.
- Service kits available for purchase.

# Drinking Fountain: Apollo 900

The Apollo 900 is a new, sleekly formed stainless steel fountain with a uniquely tapered body and integrated basin. It is durable and vandal resistant like all our outdoor disabled accessible fountains. This “big brother” to the Apollo 300 keeps many of its practical functionalities with an updated body design.

- Dimensions**
- Total Height: 860mm
  - Clearance Height: 760mm
  - 200mm x 100mm tapered stainless steel
  - One piece heavy duty construction
- Plumbing**
- In built water pressure regulator ½' inlet
  - 40mm Waste outlet pipe
- Finishes**
- Primed and 2 pak epoxy wet spray finish.
  - Bead blasted / electropolished, clear coated for protection, stainless steel finish
  - Available in many different colours. [See colour selector](#)
  - All fountains come with vandal resistant 316 stainless steel security screws
- Options**
- Optional tap available
  - Full parts and technical back up service available.
  - Service kits available for purchase.
  - Dog Bowl

fountains + furniture

# Pet // Drinking Fountain: PF600

Our pet accessible fountain enables dog lovers to provide fresh drinking water for their dogs whilst out in public places. The PF 600 is becoming increasingly popular with local councils for use in their off leash areas in parks providing water for owners and their dogs.

The common “post bubblers” with tap attachments, usually with a plastic bowl placed by a considerate dog owner, is unsightly and will soon be a thing of the past with the introduction of the PF 600. Excess water is directed in to the dog bowl which can be emptied by a simple tipping of the bowl.

- Dimensions**
- Total height: 987mm
  - Width: 257mm
  - Dog bowl height: 150mm

- Finishes**
- Hot spray galvanised
  - Powdercoated

- Options**
- Optional tap available
  - Stainless steel

# Products // Bench Seats

# Bench Seat: Alperton

The Alperton Bench Seat is a durable, streamlined and modern seat. Manufactured in cast aluminium with timber slats, the Alperton has been ergonomically designed to give a comfortable seating position.

All seats have been designed to give optimum strength and durability. The Alperton is made of the highest quality imported Kwila, suitably seasoned and treated with three coats of hardwood oil for durability and enhanced natural appearance.

- Dimensions**
- Seat height: 475mm
  - Seat length: 1750mm
- Materials**
- Cast aluminium
  - Kwila timber battens 168mm x 31mm, 68mm x 31mm
  - Perforated sheet metal as an option
- Finishes**
- Available in a variety of powder coated colours
  - Raw alloy finish available
  - All timber battens are Kwila timber, protected with 3 coats of hardwood oil.
- Options**
- Raw alloy finish
  - Perforated sheet metal instead of timber battens
  - Optional arm rests

# Bench Seat: Phoenix

The Phoenix is simple yet elegant seat. Manufactured in cast aluminium with timber slats, the Phoenix has been ergonomically designed to give a comfortable seating position.

All seats have been designed to give optimum strength and durability. The Phoenix is made of the highest quality imported Kwila, suitably seasoned and treated with a double stain and high quality clear coat for durability and enhanced natural appearance.

It can be tailor made to suit your individual requirements. The standard model is 1750mm long but we can manufacture to any specifications.

- Dimensions**
- Seat height: 450mm
  - Seat length: 1750mm
- Materials**
- Cast aluminium
  - Kwila wooden slats 31mm x 65mm
- Finishes**
- Powdercoated in your choice of colour
  - Kwila timber protected with 3 coats of hardwood oil
- Options**
- Arm rests

# Butt Bin: BB01

The Cigarette Butt Bin is a uniquely designed cigarette butt receptacle that helps reduce littering by smokers.

The custom designed wide angled top allows butts to fall in to the bin by gravity reducing the unsightly collection of butts "stuck" at the top that is seen by so many other designs. The Butt Bin is emptied by a single one handed key operation.

There is no handling of the contents of the bin at all. This greatly reduces the risk of contamination by the handler and the risk of needle stick injury if inappropriate contents were put in to the bin.

- Dimensions**
- Height: 876mm
  - Receptacle Diameter 152mm
- Materials**
- Receptacle – 304 Stainless Steel
  - 50 x 50 RHS Steel Post – Zinc Plated
  - 8mm Steel Base Plate – Zinc Plated
  - Unique "Key Only" Operating System
- Finishes**
- Stainless Steel
- Fixings**
- In ground fixing available
  - Surface mounted with Dynabolts
- Options**
- Powder Coated in your choice of colour

# Shower: SS150

Our SS150 stainless steel showers would compliment any Australian beachfront, public swimming facility or private resort. We use only 445 and 316 stainless steel sheeting that will withstand the harshest coastal climate and prevent corrosion. The stainless steel can also be powder coated in a variety of colours to blend with or enhance the surrounding environment. All activator buttons are on set timings to prevent water wastage.

- Dimensions**
- Height: 2200mm
  - Width 162mm
- Materials**
- 445 Stainless Steel
  - 8mm Base plate in 316 Stainless steel
  - Timed water activator buttons
  - Chromed shower roses
- Finishes**
- Satin stainless finish
- Fixings**
- Electropolished
- Options**
- Surface mounted with Dyna bolts
  - In-ground
  - Wall mounted
  - Foot shower combination
  - Side mounted taps
  - Hand rails

# Tree Grates: 1200 x 1200

Due to an increase in demand for a stronger and more practical tree grate, we have designed a range of laser cut steel grates that are far superior to the aluminium grates currently on the market.

- Dimensions**
- Grate size: 1191mm x 1191mm
  - Centre cut out: 380mm diameter
  - Frame size: 1121mm x 1121mm
- Materials**
- Laser cut steel plate
  - Steel bar supports
- Finishes**
- ANTI SLIP "W" Rating for footpaths
  - Hot dipped Galvanised
  - Powdercoated in your choice of colour
- Fixings**
- Galvanised angle support frame
  - Quick release cam locks
  - 6mm bolts
- Options**
- Off set tree grates
  - Any size, shape or pattern available on request
  - Variable centre cut out size
  - Logos incorporated
  - Illuminated grates
  - Tree guards

# Tree Grates: Custom

By using Auto CAD technology, Urban can design and reproduce almost any shape or pattern imaginable beyond the basic styles illustrated. A laser cut logo or motif can be added to create an individual look or theme for an urban streetscape or uniformity throughout a Council Shire.

- Dimensions**
  - Grate size – Any size available
  - Centre cut out – 200mm – 600mm available
  - Frame size – Any size to suit your application
- Materials**
  - Laser cut steel plate
  - Steel bar supports
- Finishes**
  - ANTI SLIP “W” Rating for footpaths
  - Hot dipped Galvanised
  - Powdercoated in your choice of colour
- Fixings**
  - Galvanised angle support frame
  - Quick release cam locks
  - 6mm bolts
- Options**
  - Off set tree grates
  - Any size, shape or pattern available on request
  - Variable centre cut out size
  - Logos incorporated
  - Illuminated grates
  - Tree guards

# Tree Grates: Offset

For existing trees planted at unusual distances from the curb, Urban can supply individually profiled cut grates modified from the illustrated patterns to suit any application. In the past trees that were planted at unequal distances from the gutter were unable to receive an aluminium or cast iron grate. However, the use of our split tree grate frames allow our grates to be fitted around existing trees.

- Dimensions**
- Grate size: Any size available
  - Centre cut out: 200mm – 600mm available
  - Frame size: Any size to suit your application
  - Split Frames to suit existing trees
- Materials**
- Laser cut steel plate
  - Steel bar supports
- Finishes**
- ANTI SLIP “W” Rating for footpaths
  - Hot dipped Galvanised
  - Powdercoated in your choice of colour
- Fixings**
- Galvanised angle support frame
  - Quick release cam locks
  - 6mm bolts
- Options**
- Any size, shape or pattern available on request
  - Logos incorporated
  - Illuminated grates
  - Tree guards

# “Soak Thru” Porous Paving

Soak Thru is a safe bonded aggregate that provides a viable and aesthetically pleasing alternative to traditional tree grates. It's an innovative and economical paving system designed to filter water through to the underlying media. Soak Thru porous paving is virtually maintenance free and there is no back filling required.

The paving is designed to withstand the normal loads associated with pedestrian and light vehicular traffic. The Soak Thru paving is also ideal for tree grate application. It can be installed directly around the tree (preferred method of application) or into a frame\* to make porous paving removable.

\*Please note that some restrictions in use will apply by utilising this method.

## Features & Benefits

- Minimises trip hazards
- Stops unsightly litter / cigarette butt collection
- Safe non slip surface – Tested in accordance with AS/NZS 4586:1999 Standard.
- Water filters quickly through to tree roots and subsoil – Tested in accordance with AS/NZS 4456.16:1997 – 4673mls per minute.
- Installed by experienced installers on site
- System can be tailored to suit your individual application
- Variety of aggregate finishes available
- Growth rings can be inserted to account for tree growth
- Logo or Motif can be incorporated into finished grate
